Leasing / Financing Options Available

The SSD-750 solid state drive shredder is designed for the sole purpose of shredding SSD type memory devices. The shredder is equipped with a single infeed with 3/8" cutters.

All of our SSD shredders are manufactured with a powder coated finish which offers greater durability and corrosion resistance than a traditional painted finish. The cutters are manufactured from the same material jack hammer bits are, making them extremely durable and exceptionally long lasting.

Our SSD shredders are capable of shredding standard SSDs, flash drives, PC Boards, CDs, Blue Ray Discs and assorted e-waste. These shredders are designed for stationary applications and they can also be installed in trucks for on-site mobile shredding.

SPECIFICATIONS	SSD-750
Power Requirements In Voltage	208, 230, 460 - 3 Phase
Motor Output In HP	7.5
Shred Width Solid State Drives (inches)	0.375
Infeed Dimensions W/H (inches)	11/2.5
Standard Solid State Drives/Hour	1,800
Weight (lbs)	2,900
Size L/W/H in Inches	77/56/56
Standard Features	Heavy Duty Casters, On/Off Key, Output Conveyor, Saw Tooth Hooked Cutters & High Torque Motor For More Efficient Product Destruction, Powder Coated Finish
